- ❌ to prepare templates;
- ❌ to have workers skilled in art on the site;
- ❌ more time (more days) to finish the surface.

HOWEVER, THERE IS ALSO A MORE EFFECTIVE WAY OF REALIZING AN INTERESTING WET POUR SURFACE

- ✅ realize a more attractive (more competitive) wet pour surface;
- ✅ install all graphic component on the top surface layer easily and quickly just in one day;

THICKNESS OF 4SOFT 2D WET POUR GRAPHICS IS 10 MM. FOR UV SENSITIVE COLOURS, WE USE ALIPHATIC BINDER.

WE ARE CONSTANTLY WORKING ON IMPROVEMENTS!

- It is a hand-made product not fabricated on a pressing machine. The reason is simple! Prefabricated graphics looks the same as the rest of the EPDM surface.

ALL IN ONE WORKING DAY - GRAPHICS AND SURFACE

Stable and durable joins

- No cracks inside of the graphic components** – different colours inside of the components are connected only by wet joins (no knife cutting or water jets are used).
- Specially shaped, no cutting, with oblique edges under 45° angle which means perfect adhesion of the EPDM wet pour surface around the graphics as well as stable and durable joins.
- Each detail is made from EPDM granules without any additional surface painting.**

WAYS OF USING PREFABRICATED 2D GRAPHICS

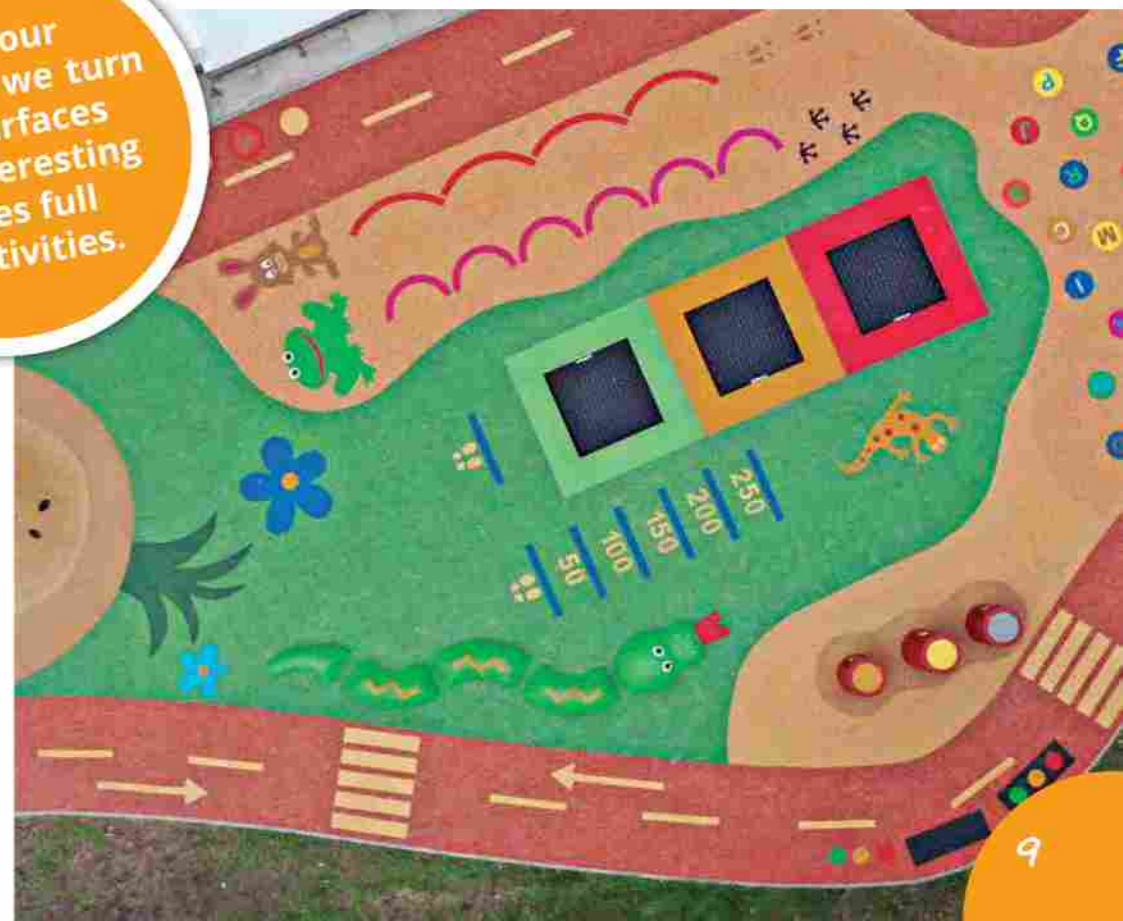

JUST
GLUE
IT!

There are many ways of using our **2D graphics** to transform a dull **EPDM surface** into an entertaining and educational place. All you need is just to choose the right graphic components and glue them. The rest of the surface **installation is then very simple.**

With our graphics, we turn dull surfaces into interesting places full of activities.

3D GRAPHIC COMPONENTS

made by 4soft

4SOFT WATER FOUNTAINS (JETS) HAVE MINIMAL WATER CONSUMPTION RANGING FROM 2.6L/MIN TO 7.4L/MIN.

ALL YOU NEED IS A STANDARD WATER GARDEN CONNECTION WITH NORMAL PRESSURE OF 2.5-3.5 BAR.

THERE ARE TWO OPTIONS OF CONTROLLING THE OPENING AND CLOSING OF WATER CONNECTION TO THE FOUNTAIN.

Standard water consumption of the jet nozzles we use for 3D fountains is 3.7 l/min. However, we can provide you with different nozzles with more or less water consumption – meaning a bigger or smaller cone of squirting water.

- A standard **stop cock (stop tap)** included.
- Electric button – there is a possibility to set up the duration of water squirting from the fountain. For example **2 minutes** TURN ON and 1 minute PAUSE. It works with a **6V** battery – **no need to have a 220V supply.**

TERRACES AND PAVEMENTS

WITH 4SOFT GRAPHICS

These places are usually forgotten to be used in the realisation of wet pour surfaces even though there is often an almost ready sub-base for direct installation. This makes the terraces and pavements attractive for fast and economical installation of the EPDM surface. 4soft hopscotches, geometric shapes, traffic signs, logos etc. make the children happy.

Make or renovate the terraces and pavements more creatively. You can find more ways of using the EPDM surface. It is not only a safety surface, it is much more than that.

3D PLAYHOUSE

MADE BY 4SOFT

The 3D PLAYHOUSE is another playing element for children to be placed in the EPDM surface. The structure of this element consists of stainless steel covered with a certified two-layer safety surface. The 3D PLAYHOUSE can be used separately as a single element or as a part of the complete playground equipment.

The 3D PLAYHOUSE can be climbed over and used as a climbing wall. Its surface is fitted with grips enabling easier movement over the element.

A small window built in its upper part with filler panels made of Makrolite 12 mm material, which is transparent and resistant.

- No obstacles should be placed within 1.5 m from the foot of the 3D PLAYHOUSE. HIC is 1.2 m.
- The 3D PLAYHOUSE can also be made in other theme-specific modifications.
- This product was developed and designed for both outdoor and indoor use and meets the European standard EN 1176-1.

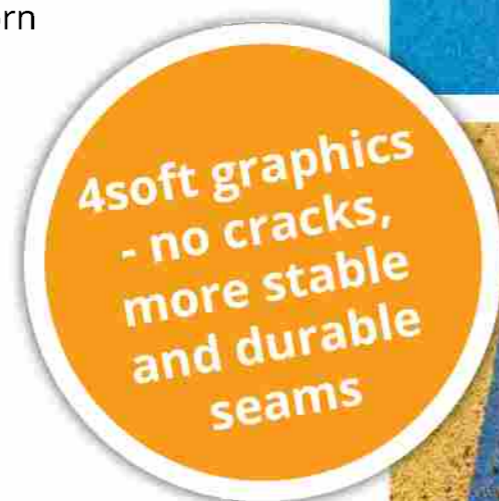

BEWARE OF THE LOW-QUALITY IMITATIONS!

ATTENTION! CERTAIN SUPPLIERS MAKE THE GRAPHIC ELEMENTS ONLY BY A SIMPLE PAINTING OR SPRAYING THE SURFACE.

These kinds of pictures are not durable and the paint gets "worn out" after a year or two and the picture disappears. Request only graphical features made from coloured EPDM granules, which retain their colour for the whole lifespan of the surface even in extremely stressed areas.

EPDM LOGO

A GREAT WAY OF PROMOTING YOUR NICE WORK IS TO INSTALL YOUR LOGO DIRECTLY IN THE EPDM SAFETY SURFACE.

4soft can make your logo according to the data sent by e-mail.

It is not only a good promotion of your work but it can also be offered to investors, municipalities, sponsors or any other organizations that want to be visible on the playground surface.
