

ECO-play®

Natural playgrounds

*Inspired by
nature*

ECO-play[®]

A lot of children are growing up in a world of concrete and metal. However we are now aware that a green environment can improve the health and well-being of young and old. Children are therefore encouraged to play in line and with respect for nature. Over the last few years, many playgrounds are more equipped with natural materials such as tree trunks and wooden play equipment,...

Research shows that natural play offers unique challenges and learning opportunities to children. It makes playing more interesting and afterwards they generally feel better. Green playgrounds also invite children to exercise in a more intensive and varied way.

Eco-play Mission

Europlay manufactures imaginative playground equipment– for public use – designed to stimulate creative play.

Eco-play is a range made by:
