SIMBA[®]
Group

SIMBA provides professional customer service developed through specific standards. These standards not only provide you with the highest level of service, but also facilitate consistent and systematic contact with the customer.

SIMBA's standards regulate our work with and how we service our customers. These standards primarily regulate how company employees should behave when dealing with customers. Customer satisfaction is always the superior value. Our standards are designed to build positive relationships with customers.

SIMBA's customer service standards cover all elements of the sales process. We offer professional service at every level of contact, based on standardised procedures that flexibly adapt to the individual needs and expectations of each of our customers. Setting up a playground is a responsible challenge when it comes to the safety of the little ones. We design our playgrounds according to a strictly defined scheme so that the future users are 100% satisfied and safe.

SIMBA's service standards are tailored to our customers, correspond to their needs and expectations, and show them that they are valuable and appreciated by the company. For us, the customer must have the impression of complete openness from the person serving them. Even while adhering to strict rules, it is important for us to maintain a certain freedom in our interactions. This allows us to remain spontaneous and natural in dealing with the customer.

SIMBA follows an individual approach to each customer. We provide comprehensive implementation of various types of investments, both standard and those with a more difficult degree of implementation. Our customers include municipalities, housing associations, private investors,

developers, construction companies, hotels, educational institutions and many others. We are aware of the new challenges that we have to face these days. Although they require constant change, we will always remain true to the core objectives and values of our company.

SIMBA has its own design and graphics department, which is responsible for creating design documentation for playgrounds. All equipment is the original design of our employees. We are customer-oriented. We offer comprehensive preparation of design documentation, from land development plans, through construction designs for the notification of works that do not require a building permit, to projections and visualisations of playgrounds.

SERIES JUNGLE

Sets from the JUNGLE series are a specially designed combination of colours and elements intended to take children into a world of imagination and fantasy. A varied set of equipment allows children to let off some steam and unleash their hidden monkey tricks. While designing these sets, as well as others, our priority was mainly to keep children entertained and safe.

SERIES CITY BASIC

The CITY modular system is a wide selection of modules enabling independent arrangement of the equipment. In addition to a large number of elements, the equipment is fitted with a unique, pastel set of HDPE panels. A presentation of the complete modular system is available on our website www.simba.pl and in the electronic version of our catalogue.

SERIES CITY PASTEL

Our CITY series sets are a creative combination of high-quality armoured and powder-coated steel and HDPE. Safety elements in special pastel colours. When designing the City series sets, we were inspired by pastel colours from fairy tales. The combination of top-quality materials, safety, durability and a fairytale atmosphere will provide fantastic fun for children, and bring back childhood memories for parents.

SERIES NATURAL

The **NATURAL** modular system is a self-design system inspired by the colours of nature, with a unique colour palette of HDPE panels. The construction elements are made of glued laminated timber protected by oil impregnation. You can now design your dream playset by yourself. A presentation of the modular system is available on our website www.simba.pl and in the electronic version of our catalogue.

SERIES SPACE

The equipment of our **SPACE** series is another of our designers' innovative ideas. Making a playground with the use of toys from the Space series will provide not only great fun, but also stimulate the imagination of little explorers. While designing, we were guided by the vision of a modern line of equipment that would fit in perfectly with both traditional buildings and modern urban architecture.

SERIES GARDEN

The **GARDEN** Series equipment is our designers' original idea for a complete product line. A ready-made set of equipment to create an intriguing playground. The toys, thanks to their natural appearance, perfectly harmonise with the surrounding landscape of green areas, such as parks and urban green spaces, and amidst modern housing, providing a substitute for nature.

SERIES ANIMALS

Our equipment from the ANIMALS series is a unique addition to any playground. The unusual appearance, varied sizes and the best quality HDPE panels meet the requirements of even the most demanding customers. The slides integrated into smiling animals provide fantastic fun, influencing the learning of one's own body balance. They also help in getting used to heights and encoding a correct, safe position for possible falls in everyday life. Slides are especially recommended for shy and apprehensive children.

ROCKERS

ROCKERS are among the most popular toys for children. They particularly influence the development of the sense of balance. Staying on a spring-loaded device requires quick reactions and using the right amount of force at the right moment. Playing on the rockers positively affects the development of most of the child's muscle groups.

BELT SWINGS

SWINGS, which are all kinds of devices that allow the child to move rhythmically in certain directions, are recommended for children of all ages. Swinging can be very calming. For children, this movement is associated with infancy and being lulled to sleep in their parents' arms. Swinging is especially important for distracted children. It has been proven that children who often use swings concentrate more easily on activities and learn faster. Double swings made of wood and metal can come in different variations and the seats can be changed.

SEESAWS

Our seesaws perform mostly the same functions as belt swings. In addition to the sense of balance, they affect the development of the children's lower muscle groups.

CAROUSELS

CAROUSELS are an integral part of any playground. They ensure the rapid development of the sense of balance, training of the labyrinth, body balance and group play. The advantage of carousels is that they can be used by children of all ages. Children who use carousels have less trouble falling asleep and staying asleep.

SANDPITS

In addition to providing great fun playing with other children, **SANDPITS** allow children to get to know the surrounding world and are excellent for developing both imagination and creativity. It is proven that children who play in a sandpit, building sandcastles and various forms from sand, are more creative.

FREE-STANDING EQUIPMENT

FREE-STANDING EQUIPMENT is an excellent addition to any playground because of its variety and relatively small size. It includes toys that influence the development of all muscle groups, develop the imagination and perform extremely important functions in the educational and social development of children. We make free-standing equipment in wood and steel.

TRIM TRAIL

TRIM TRAILS have a significant impact, above all, on the development of the sense of balance and teach children how to balance their bodies. These devices are recommended for all children from an early age. They should especially be used by children who frequently trip and fall over. The devices improve motor coordination and maintain good physical fitness.

MOTUS MODULAR SYSTEM

We encourage you to familiarise yourself with our **MOTUS** modular system. The unique system of combining any elements will allow you to compose your own concept of a device, providing a comprehensive solution for the development of children's motor skills. A presentation of the complete modular system is available on our website www.simba.pl and in the electronic version of our catalogue.

NET CLIMBERS

Our **NET CLIMBERS** have a positive impact on the appearance of our playgrounds and play an extremely important function in children's motor development. They help to develop the upper and lower muscle groups in children. They also help in overcoming the fear of heights, support the sense of balance and the ability to balance the body.

STREET WORKOUT

STREET WORKOUT are dedicated to people of all ages. There is something for everyone. Young people, adults and, by combining the device with concepts of gym equipment, also the elderly. Using these devices we will ensure excellent physical condition and sculpt the figure. For exercise, we use the weight of our own body without additional loads, which is known to be the healthiest and safest form of physical activity. The modular system used in the series makes it possible to configure the set according to the customer's wishes.
